

Naman Kumar Chaudhary

+91-8175811738 – Email – [LinkedIn](#) – [GitHub](#) – [LeetCode](#)

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript

Frontend: HTML5, CSS3, React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, WebSockets, Socket.io, Redis

Database: MySQL, MongoDB, PostgreSQL

Testing & API Tools: Jest (Unit Testing), Postman, Hoppscotch

DevOps & Cloud: Docker, Kubernetes, CI/CD, AWS (EC2, S3), Git, GitHub

Education

Ajay Kumar Garg Engineering College

Bachelor of Technology in Computer Science and Engineering

Ghaziabad, India

Oct 2023 - May 2027

Kendriya Vidyalaya No.1 School

Class XII: 90%, Class X: 88%

Gorakhpur, India

Apr 2010 - Jun 2022

Professional Experience

Sirhaana

Technical Intern

Mar 2026 - Aug 2026

- Implemented permission-based access control across the admin panel's **76+** API endpoints and **8** user roles, with the UI reading the same rules the backend enforces
- Moved AI prompt lookups onto a **Redis** cache-aside layer so reads no longer hit the prompts table. The cache warms on boot, back-fills from the DB on a miss, and re-syncs on every prompt create, update, or delete
- Traced an intermittent image-generation bug to an API quota limit rather than a code defect, and fixed a staging outage by making the deploy self-healing instead of depending on manual scripts

The Spiritual Company

Full Stack Developer Intern

Jan 2026 - Mar 2026

- Set up independent CI/CD pipelines for **3** microservices on **Hostinger**, clearing the CORS misconfiguration and Git deployment blocks that were preventing auto-deploy on push
- Configured **Redis** caching and rewrote slow database queries, cutting API response times and easing read load on the database
- Wrote a domain-grounded chat assistant with custom prompting and multi-turn context handling, and rate-limited the paid endpoint to keep costs bounded

Technical Projects

Naulej - Student Career Development Platform

[GitHub](#) – [Demo](#) – Jan 2026 - Feb 2026

- Shipped a **MERN** job platform with separate student and recruiter roles across **22** REST endpoints, deployed on **AWS EC2**
- Scored resumes against job descriptions using **GPT-4o-mini**. The PDF is parsed once at upload and cached, so each check costs one API call and returns a match score, keyword coverage, missing skills, and suggested fixes
- Kept resumes off the app server by streaming uploads to **S3** and serving them back through presigned URLs that expire in minutes. **Razorpay** payments unlock premium only after the HMAC signature verifies server-side

CareerSphere - Social Media Platform

[GitHub](#) – [Demo](#) – Dec 2025 - Jan 2026

- Developed a social networking platform with **Next.js** and **Express**, with **20** REST endpoints over five **Mongoose** models: users, profiles, posts, comments, and connections
- Wired the social feed through **Redux Toolkit** so posts, likes, comments, and media uploads all update through three reducers, keeping feed state consistent no matter which page triggers the change
- Generated resumes server-side with **PDFKit**, composing profile, work history, and education into a downloadable file on request

MeetHub - Video Conferencing Platform

[GitHub](#) – [Demo](#) – Nov 2025 - Dec 2025

- Built a video conferencing app with **React** and native **WebRTC**. No SDK and no media server: peers connect directly, and **Socket.io** only relays the offer/answer/ICE handshake
- Went with a full-mesh topology so each participant streams straight to every other one. Latency stays low and server cost stays at zero, though bandwidth grows with room size
- Added screen sharing that falls back to the camera when sharing stops, in-room chat with timestamped history, and auto-generated meeting IDs that are easy to read aloud

Achievements

Peak **LeetCode** contest rating of **1510** and a **2-star CodeChef** rating

Solved **400+** DSA problems on **LeetCode**, **GeeksforGeeks**, and **CodeChef**

Finalist among **50** teams at the **Rumik × AWS Hackathon**

Competed in the **TensorX National AI Hackathon 2026**, hosted by **Poonawalla Fincorp**
